# INTRODUCTION

---

The **LIFE MIDMACC project** promotes adaptation through the implementation and monitoring of different landscape management measures to face the challenges of climate change in the marginal mid-mountain areas of Spain (La Rioja, Aragon and Catalonia), while improving their socio-economic development.

# SEMINARS'S OBJECTIVES

---

- To present the main results of the LIFE MIDMACC project, gathered in the document "Climate change adaptation measures in the Mediterranean mid-mountain areas: a practical guide".
- To present the lessons learned manual for the transfer and replication of MIDMACC adaptation strategies.
- To further advance the potential for replication of MIDMACC experiences among the Euro-Mediterranean mountain territories.
- To advance in the development of a joint strategy to ensure the impact of the project's results on the sectoral ongoing policies.
